

**2014**  
**Organizational Report**  
**of the**  
**Joint Review Committee on Education**  
**in Radiologic Technology**

***Mission Statement***

*The JRCERT promotes excellence in education and elevates the quality and safety of patient care through the accreditation of educational programs in radiography, radiation therapy, magnetic resonance, and medical dosimetry.*

## Core Values

- Believes educational quality and integrity should not be compromised.
- Respects and protects the rights of students.
- Promotes the welfare of patients.
- Encourages educational innovation.
- Collaborates with other organizations to advance the profession.
- Exemplifies the highest ethical principles in its actions and decisions.
- Responds in a proactive and dynamic manner to the environment in which we operate.

*Letter from the Chair . . . .*

Promoting excellence in radiologic sciences education has been the hallmark since the inception of the Joint Review Committee on Education in Radiologic Technology (JRCERT). The JRCERT remains the gold standard for programmatic accreditation. Our responsibility is to help ensure graduates from our accredited programs have the knowledge, skills, and professional values required to provide safe, high-quality diagnostic and therapeutic radiologic services to patients.

Looking back at 2014, the key activities undertaken by the JRCERT were as follows:

- The JRCERT implemented the revised Standards on January 1, 2014.
- The JRCERT was granted continued recognition by the Council for Higher Education Accreditation (CHEA) after defending its petition to the Committee on Recognition in June 2014.
- The JRCERT and the American Society of Radiologic Technologists (ASRT) met for their annual meeting to discuss current issues in the profession.
- The JRCERT participated in the ASRT Leadership Academy for Educators.
- The JRCERT presented lectures on various accreditation issues at many state and national professional meetings.
- The JRCERT conducted accreditation seminars, outcomes assessment workshops, and site visitor workshops.
- The JRCERT sent representation to the New Mexico Medical Imaging and Radiation Therapy Advisory Council (MIRTAC) speaking in support of programmatic accreditation.
- The JRCERT Board adopted the American Society of Radiologic Technologists Radiation Therapy Curriculum effective September, 2015.
- The JRCERT contracted with PowerObjects to create a new accreditation management system (AMS).

“Promoting excellence in education and elevating the quality and safety of patient care through accreditation of educational programs in radiography, radiation therapy, magnetic resonance, and medical dosimetry” is the mission of the JRCERT. The JRCERT Board of Directors and staff are proud to support this mission and wish to thank our programs for their continued support.

*Debra J. Poelhuis, M.S., R.T.(R)(M), Chair*

## *A concluding comment from the Chief Executive Officer*

*As detailed by Ms. Poelhuis in her letter, 2014 has been a very productive year for the JRCERT. As Chair of the Board of Directors, she was instrumental in assuring that the goals of the organization were met. Ms. Poelhuis now completes her six-year tenure on the Board. Her dedication and commitment to the organization has been invaluable; she has been a tremendous asset to the JRCERT.*

*The JRCERT organization will miss her enthusiasm and leadership while serving on the Board of Directors. On behalf of the Directors and staff, I would like to thank Ms. Poelhuis for her service and extend our wishes for continued success as an educator and leader in our profession.*

*JRCERT staff would like to thank all Board members for their hard work and dedication in maintaining the high standards of educational excellence for the many programs accredited by the agency. This has been an extremely hardworking Board and we sincerely appreciate all they have contributed.*

**Leslie F. Winter, M.S., R.T.(R)**  
**Chief Executive Officer**

## *Budget Summary*

The increase in JRCERT expenses continues to be directly attributed to the implementation and continuing management of the Accreditation Management System.

# Value of Accreditation

The higher education community in the United States has become dependent upon accreditation as the primary vehicle for assuring the quality of educational institutions and programs. The JRCERT believes programmatic accreditation to be the optimal method available to determine whether higher education in radiography, radiation therapy, medical dosimetry, and magnetic resonance, is of sufficient quality to provide the knowledge, skills, and professional attributes needed by graduates to meet the growing needs of the communities they will serve.

Accreditation is founded on the principles of self-analysis and peer review evaluation. It is the only accepted method used by the federal government to determine the quality of higher education and for establishing eligibility to receive federal and state funding.

Credibility of the programs is measured by compliance with the standards established by the profession. JRCERT accreditation not only assures that the program meets minimal quality standards, it also assures the public that the sponsors of JRCERT-accredited programs go through the same self-analysis and peer review evaluation by an appropriate institutional accreditor.

Programmatic accreditation provides value in several additional ways. JRCERT accreditation establishes the student capacity of programs based upon the availability of resources; assures fair, ethical, and equitable treatment of students, faculty, and staff; and adherence to federal safety regulations. It encourages programs to strive continually to improve their current level of quality. To document consistency and comparability, the JRCERT provides direct comparisons of quality across all programs regarding program effectiveness measures—program completion rate, credentialing examination pass rate, and job placement rate. These comparison statistics can be found at [www.jrcert.org](http://www.jrcert.org), Students Tab, Program Effectiveness Data.

The JRCERT works with other professional organizations, for example, the American Society of Radiologic Technologists (ASRT) and the American Association of Medical Dosimetrists (AAMD) in order to establish educational curricula that meet the needs of the respective professions.

Some employers and/or states use graduation from a JRCERT- accredited program as one of the criteria for employment and/or licensing. Graduates of JRCERT-accredited programs are eligible for employment in all 50 states.

## *Reported Program Effectiveness Data*

An annual report is required of all continuing programs. This report reflects 2013 data reported by programs. Programs received the annual report survey requests in April of 2014 and were required to respond by July 1, 2014 with program effectiveness data for their graduating class of 2013. All submitted information was reviewed for accuracy and, when necessary, any concerns were addressed in 2014 or early 2015 for programs with late graduation months.

	<b>Average Annual Program Completion Rate</b>	<b>Five-Year Average Credentialing Exam Pass Rate at 1<sup>st</sup> Attempt Within Six Months</b>	<b>Five-year Average Job Placement Rate, 12 months Post- graduation</b>
<b>Radiography</b>	80%	94%	89%
<b>Radiation Therapy</b>	86%	91%	89%
<b>Magnetic Resonance</b>	89%	95%	97%
<b>Medical Dosimetry</b>	92%	84%	96%

# # of Programs (Gains and Losses) Per Year

## Radiography

## Radiation Therapy

## Medical Dosimetry

## Magnetic Resonance

# *Trending for Educational Programs*

## *2011-2013*

All figures provided are approximate. Data is based upon information provided in 2011, 2012, and 2013 program annual reports. Not all programs, such as those closing, were required to submit a report. (Note: The data provided here may contain minor differences from other information in the report due to timing of data collection, etc.)

<i>Year</i>	<i>Total programs</i>	<i>Total Potential Enrollments</i>	<i>Total Graduates</i>
<u><b>Radiography</b></u>

301 Lake Street  
Dallas, PA 18612

***ACERT Nominee ( yet to be named.)***

***With Great and Sincere Appreciation!***

## ***Board Composition***

***JRCERT Bylaws require that members of the Board represent the profession. The JRCERT solicits nominations and appoints members from the following organizations:***

American Association of Medical Dosimetrists (AAMD)

Association of Collegiate Educators in Radiologic Technology, Inc. (ACERT)

American College of Radiology (ACR)

Association for Medical Imaging Management (AHRA)

American Society of Radiologic Technologists (ASRT)

Association of Educators in Imaging and Radiologic Sciences, Inc. (AEIRS)

AND a public member.

## ***Key Accomplishments***

**Accreditation Management System (AMS)**—after initial implementation of the long awaited AMS, it became necessary to take the system out of service in mid-July due to malfunction of the “Portal” utilized by programs. Since that time, the JRCERT has investigated new systems to again provide programs the capability to update data and submit requests for modifications. We are pleased to report that a new system with expanded capabilities for both programs and staff is being built by a new vendor partner. As the project moves forward, we will keep programs informed.

**ACERT-Nominated Board Member**—the JRCERT Board of Directors has approved the addition of an additional board member, increasing the number of directors to nine. The Association of Collegiate Educators in Radiologic Technology, Inc. (ACERT) will nominate individuals to fill this new position. ACERT represents 55 institutional members from 28 states, 71 associate members, and two life members.

**CHEA Recognition**—the JRCERT has sought, and has once again, received the maximum recognition award of five years from the Council for Higher Education Accreditation (CHEA). This recognition affirms that the standards and processes of the JRCERT are consistent with quality, improvement, and accountability expectations established by CHEA. This recognition is intended to advance academic quality, with emphasis on student achievement, demonstrate accountability through consistent, clear, and coherent communication to the public and the educational community, which includes a commitment by the JRCERT to involve the public in accreditation decision making.

**Policy Change**—New program directors are typically high-performing individuals that are promoted from other positions. Unfortunately, they often lack some of the basic knowledge necessary to assure that their programs remain in compliance with all accreditation standards and policies. It has been noted that even when a clinical coordinator is promoted to the position, they have had limited exposure to accreditation and compliance requirements. Because of this lack of basic knowledge and understanding, the Board of Directors has taken steps to assure that these individuals are educated on accreditation requirements as quickly as possible following their appointment. JRCERT policy has been modified to require new program officials without previous program director experience to attend an accreditation seminar and/or assessment workshop within the first of year of appointment.

**Transparency**—This is a current topic in all educational circles and programs will continue to hear about the importance of transparency not only from programmatic accreditors but from institutional accreditors as well. Transparency is considered operating in such a way that makes it easy for others to see the activities and performance of educational programs. It implies openness, communication, and accountability. Late in 2013 and through the early part of 2014, all programs were asked to make certain that key program information was placed on their Web page in order to communicate to potential students and the public a clear picture of what is expected in order to complete the course of education, both academically and financially. The publication of program effectiveness data (credentialing examination pass rate, job placement rate, and program completion rate) served to address the accountability aspect of transparency. By July, 100% of programs were in compliance with the publication of the required information. We are extremely pleased with the response by our programs.

**New Strategic Plan**—the JRCERT has developed a new strategic plan to guide the organization in a positive and forward direction. The plan will be used to determine organizational functions and establish financial needs.

**Information Technology Administrator**—As the JRCERT continues to transition to a fully electronic accreditation process, the need for in-house IT support became apparent. We are pleased to announce the hiring of Paul Luhn to this new position.

## *2014 Accreditation Awards*

The following data represents all actions taken by the JRCERT Board of Directors from January 1, 2014 through December 31, 2014.

	Radiography	Radiation Therapy	Magnetic Resonance	Medical Dosimetry
<b>8-year</b>	48	7	1	3

## **Radiation Therapy and Medical Dosimetry site visitors needed:**

*A peer-reviewed accreditation process, such as that of the JRCERT, periodically needs additional quality site visitors. At this time, the JRCERT is in need of both radiation therapy and medical dosimetry site visitors. It is a great way to share your expertise, while learning new methods of documenting compliance with the standards.*

*If you are interested in becoming a site visitor, please go to [www.jrcert.org](http://www.jrcert.org), Site Visitors Tab, Become a Site Visitor, and complete the application.*
