**RE: Program #0333**

**Previous Accreditation Status: 8 Years**  
**Most Recent Site Visit: 10/2018**

Dear Dr. Rodriguez:

After review of the 2020 annual report, the continuing accreditation status of the associate degree radiography program sponsored by the University of Puerto Rico was considered at the May 25, 2021 meeting of the Joint Review Committee on Education in Radiologic Technology (JRCERT). The JRCERT is the only agency recognized by the United States Department of Education (USDE) and the Council for Higher Education Accreditation (CHEA) for the accreditation of traditional and distance delivery educational programs in radiography, radiation therapy, magnetic resonance, and medical dosimetry. Specialized accreditation awarded by the JRCERT offers institutions significant value by providing peer evaluation and by assuring the public of quality professional education in the radiologic sciences. The program was evaluated according to the **Standards for an Accredited Educational Program in Radiography (2014)**. The JRCERT awards:

**PROBATION.**

The Committee based this decision on areas of non-compliance with **Standard Five - Objective 5.2** of the 2014 **Standards**. Due to the transition to the 2021 **Standards** effective January 1, 2021, the program is now in non-compliance with **Standard Six**:

**Objective 6.1** - Lack of assurance that the program maintains the following program effectiveness data: Five-year average credentialing examination pass rate of not less than 75 percent at first attempt within six months of graduation and five-year average job placement rate of not less than 75 percent within twelve months of graduation. (Provide the 2017-2021 credentialing examination scores and the 2016-2020 job placement rate.)

At the request of the JRCERT the program provided its most current five-year (2016-2020) average credentialing examination pass rate at first attempt within six months of graduation as 65% (11/17). It is noted that the program reported a five-year (2015-2019) average job placement rate of 71% within twelve months of graduation.

**Objective 6.2** - Lack of assurance that the program analyzes and shares its program effectiveness data to facilitate ongoing program improvement. (Provide the action plan for the following unmet program effectiveness outcomes: credentialing examination pass rate; job placement rate.)

As identified in JRCERT correspondence of February 24, 2020 and March 13, 2021, the program must document compliance with all accreditation standards no later than **February 24, 2022** or identify mitigating circumstances hindering the attainment of this outcome.

Segundo Rodriguez, M.D.  
June 1, 2021  
Page 2

Therefore, a progress report documenting compliance with this objective is required by **January 14, 2022**. The progress report must be submitted via the JRCERT Accreditation Management Systems (AMS) and will be considered by the Board of Directors at the next available meeting after submission. Based on evaluation of the progress report, the Board of Directors will maintain, extend, or withdraw accreditation. An additional progress report may be required if the objective is not adequately addressed.

As required by the USDE and consistent with the **maximum** compliance timeframes set forth in JRCERT Policy 11.400, when the JRCERT Board of Directors determines that a program has failed to document compliance with the **Standards** and has not satisfactorily addressed the identified deficiencies, the existing accreditation status will be withdrawn. Such involuntary withdrawal of accreditation is considered an adverse accreditation action. The JRCERT defines an adverse action as involuntary withdrawal of accreditation. Involuntary withdrawal of accreditation will generally, but not necessarily, occur after a Probationary Accreditation status has been awarded. The Board may take adverse action prior to the expiration of the maximum compliance timeframe. Probationary status, as well as an adverse accreditation action, requires written notification to the United States Secretary of Education, the appropriate State licensing or authorizing agency, appropriate regional and/or other accrediting agencies, and the public.

Probationary Accreditation is an accreditation category and, consistent with JRCERT Policy 10.100, this action is not subject to appeal. Consistent with JRCERT Policy 10.700 (enclosed), the program must notify currently enrolled and accepted students, as well as the public via a website posting, of this status within 30 days of receipt of this letter. The program is required to submit a representative sample of such notification and list of recipients to the JRCERT no later than **July 1, 2021**.

The program is advised that consistent with JRCERT Policy 11.600, the JRCERT reserves the right to conduct unannounced site visits of accredited programs. The sponsoring institution would be responsible for the expenses of any on-site inspection. Also, consistent with JRCERT Policy 11.400, programs with a probationary accreditation status cannot request a substantive change.

The Joint Review Committee on Education in Radiologic Technology Directors and staff encourage you and the program faculty to continue your efforts in developing a quality educational program. If we can be of further assistance, do not hesitate to contact the office.

Sincerely,

Julia L. Lasley, Ph.D., R.T.(R)(T)
